TAJ CORAL REEF RESORT & SPA MALDIVES

The Maldives are a beautiful string of coral islands located to the south-west of the southern tip of India that form a part of the remote Indian Ocean archipelago. The Maldives consist of 26 individual atolls. The Taj Coral Reef Resort & Spa, Maldives is an idyllic paradise an hour away by speedboat from Malé International airport. With 62 luxurious thatched-roof villas dotting the scenic Hembadhu Island, guests are assured of breath-taking turquoise vistas, dramatic sunsets and a stylish spin on laidback tropical vacations.

Maldives, in the remote Indian Ocean archipelago, is more synonymous with paradise than anywhere else in the world. These coral islands have formed on the tops of a range of submerged mountains known as the Chagos-Maldives-Laccadive ridge which runs in a north-south direction, straddling the equator.

From luxury contemporary-chic villas with private outdoor sun deck to our very own reef for exploring marine wonders, every aspect is designed to delight the senses in languid pleasure. After champagne breakfast at a secluded lagoon, adrenaline-seekers can opt for game fishing expeditions, submarine trips or explore a 30 years old Shipwreck. The resort also offers guests an opportunity to participate in its award-winning environmental protection and conservation program. Come discover the underwater landscape and magic of our island heaven.
